Subject: Sewage spill(s) in Southern California from Mexico

To Whom It May Concern:

As a concerned citizen, I would like an update on the progress you have made since the huge sewage spill that happened over a year ago in February 2017 from Mexico into United States and directly into the Pacific Ocean via the Tijuana River.

I also respectfully ask that you incorporate environmental considerations into the renegotiation of NAFTA so that growth and trade do not come at the expense of wastewater and pollution in the Tijuana River Valley.

Please consider allocating federal funding for remediation of the Tijuana River Valley to facilitate the capturing of trash, sediment, and sewage-contaminated runoff before it reaches the Pacific Ocean.

In addition, I would also like you to work closely with the Government of Mexico to identify where they should prioritize infrastructure enhancement and how best implement a system of recycling to reduce all forms of pollution in the Tijuana River Valley.

Thank you for your time and I look forward to receiving your update.

Sincerely,
