Subject: Sewage spill(s) in Southern California from Mexico

Attention: Supervisor Cox

As a concerned citizen, I would like an update on the progress you have made since the huge sewage spill that happened over a year ago in February 2017 from Mexico into United States and directly into the Pacific Ocean via the Tijuana River.

I also respectfully request that you work closely with the Government of Mexico to identify where they should prioritize infrastructure enhancement and how best implement a system of recycling to reduce all forms of pollution in the Tijuana River Valley.

In addition, I also request that the County of Board of Supervisors invest funds from SB507 in the clean up of debris and pollution of the TRV instead of investing in a campground in the Tijuana River Valley.

Thank you for your time and I look forward to receiving your update.

Sincerely,
