Subject: South San Diego County Sewage - State Joint Resolution 22 (SJR 22)

Dear Governor Edmund G. Brown,

I am writing to ask that the State of California file a lawsuit against the International Boundary and Water Commission (IBWC) for its failure to address and manage the transboundary flows of sewage, chemicals and trash that put at risk the health and safety of our citizens, our Border Patrol, and our Navy Seals. For decades, cross border sewage from the Tijuana River has flowed through the Tijuana River Valley and into the Pacific Ocean, ultimately contaminating California Beaches. **To date, the State of California has not addressed the seriousness of this problem and the impact it has on residents and the economy.**

Recently, Senator Ben Hueso authored SJR 22 that calls on the State of California to file a lawsuit against the IBWC. I support this effort and ask that you stand up for our right to clean water.

Sincerely,
